DETAILED ACTION

This office action is in response to Applicant's remarks filed on April 11, 2007. Currently claims 1, and 3-28 are pending. Examiner agrees with Applicant's argument regarding the restriction requirements in office action March 6, 2007. However, regarding claims 4-8, 13-15, and 25-28 are withdrawn from consideration for the claim limitations recites the plurality of optical sensors, in which that species was restricted and not elected in corresponding to Restriction Requirement made on November 9, 2005.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 9-12, 16-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Erb et al. (US 6,251,688 B1). Erb discloses a sensing system measure one or more values, a first sensor mounted onto a side of an optical fiber. A first sensor is mounted onto a side of an optical fiber (15) and a filter is adapted to direct light to the first sensor between the fiber and the first sensor. The first sensor oriented about 45 degrees along the fiber axis (28). The sensor system further comprises of a catheter having an external tube and an internal tube enclosed by the external tube (See Figs. 1 and 6).
